LAYER⁷AI

Software Engineering Internship (m/f/d) – Tübingen

flexible (2 to 6 months)

What we do

At Layer7 AI we don't only consult on matters around Artificial Intelligence (AI), but we also leverage promising datasets to either identify, train and implement customized AI models for our clients or to build standalone scalable AI products. To stay on top of the latest developments in machine learning we collaborate with selected scientists from the Max-Planck-Institute for Intelligent Systems and the University of Tübingen, which is also the reason why we are based in Tübingen – Germany's top location for modern machine learning. Our team consists of AI researchers, former management consultants, and software engineers. This unique combination of expertise allows us to rapidly develop, test and scale AI solutions for our clients as well as for our own product development pipeline.

Job

- You work on the development of our SaaS platform which will allow our clients to integrate our customized AI models into their solution
- You can concentrate, depending on your level of knowledge, on either front-end/back-end development or deployment & cluster management or you assist us as full stack engineer in all areas
- You independently research the best libraries and frameworks which are best-suited for your task and iterate your findings in regular cycles with our CTO

Dein Profil

- You are currently pursuing or are a graduate of a bachelor's/master's degree in computer science or related field
- You have a strong passion for startups
- You already have relevant work experience such as internships or co-developing open source projects (this is a plus!)
- You are confident in at least one of the following areas including its relevant tools/frameworks and are willing to independently further your knowledge:
    - Front-end development (JavaScript, HTML, CSS und React, Angular or VueJS)
    - Back-end development in Python (or Java, Scala, Ruby, and similar) and HTTP/REST-APIs as well as databanks (e.g. MySQL or MongoDB)
    - Continuous Integration & Deployment: e.g. Travis CI, Docker and Kubernetes+
- You demonstrate a pro-active work ethic: goal-driven, independent, and structured
- You possess excellent communication and interpersonal skills to effectively communicate with our business and tech teams

What we offer you

- You shape Layer7 AI right from the start
- You create "impact" – it is our aspiration that your ideas are rapidly implemented within our company
- You work in flat hierarchies with a dynamic and highly competent team
- You generate valuable learnings in the technology of the future: artificial intelligence
- You get the opportunity to transition into a permanent full-time position
